

Tomás Agustín Hernández

Software Developer

Experience

Full Stack Developer

Nexus Negocios Informáticos | September 2021 - October 2022

I used technologies such as HTML, CSS, JavaScript, jQuery, AJAX, PHP, NodeJS, PostgreSQL and MYSQL for the development and/or implementation of new functionalities for the web page.

Full Stack Developer

Gransliving | October 2022 - December 2023

Responsible for taking the development from start to finish involving the entire team, from planning to production. Agility, SEO and web accessibility are prioritized.

I use TypeScript and NodeJS in the backend (Express framework) using NOSQL/SQL databases.

I use NextJS and TailwindCSS for styling.

Full Stack Developer

Treasure Procurement | August 2023 - Present

Leading an API software development using Django and ReactJS with PostgreSQL as database using logical and physical replication. We use TDD for development process and crafting well-tested software.

I also maintain the old system made in PHP, Ajax, jQuery using the framework of CakePHP.

Academic Data

Universidad de Buenos Aires (UBA)

Bachelor of Computer Science | March 2023 - In Progress

Escuela Técnica N35 Ing. E. Latzina

Computer Technician | March 2015 - December 2020

Abilities

- Object Oriented Programming (OOP)
- Agile Metodologies (SCRUM)
- SOLID & Clean Code Principles
- Design Patterns.
- Atomic Design.
- Web Sockets
- Accessible Rich Internet Applications

Software

- Postman
- FileZilla
- Putty
- GitHub / Gitlab.
- Linux.
- Docker.

About me

I apply requirements analysis and use of agile methodologies to carry out tasks.

I prioritize Mobile First in the structure/design of the websites and applying WCAG rules.

I like challenges and that problems are solved together.

Highly proactive.

In constant learning.
